

Our Very Own Star: The Sun

Project SEE Edition

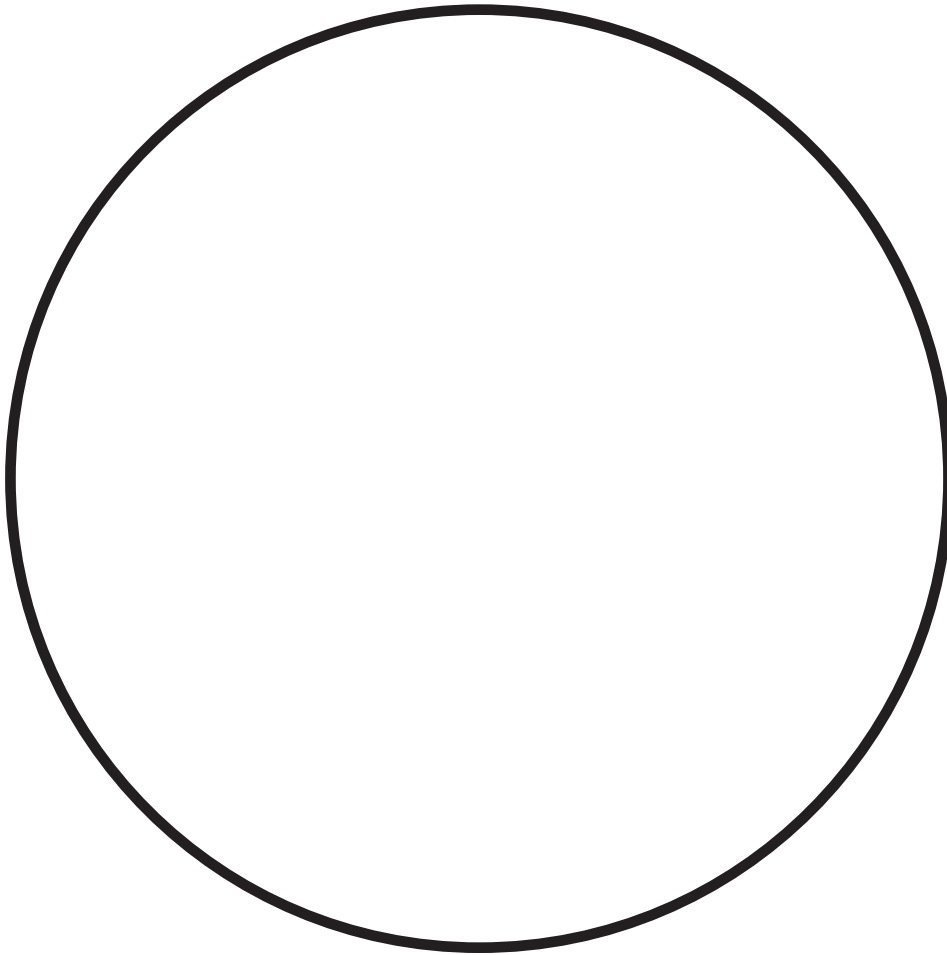

A night sky full of stars

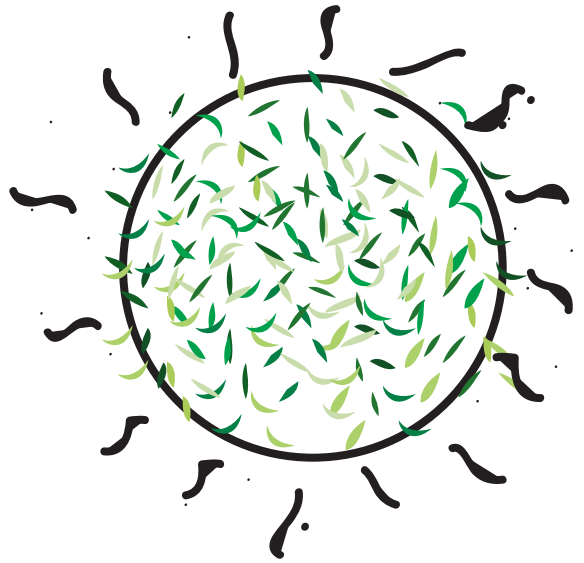

- bright star
- faint star

Comparing the size of the Sun and our Earth

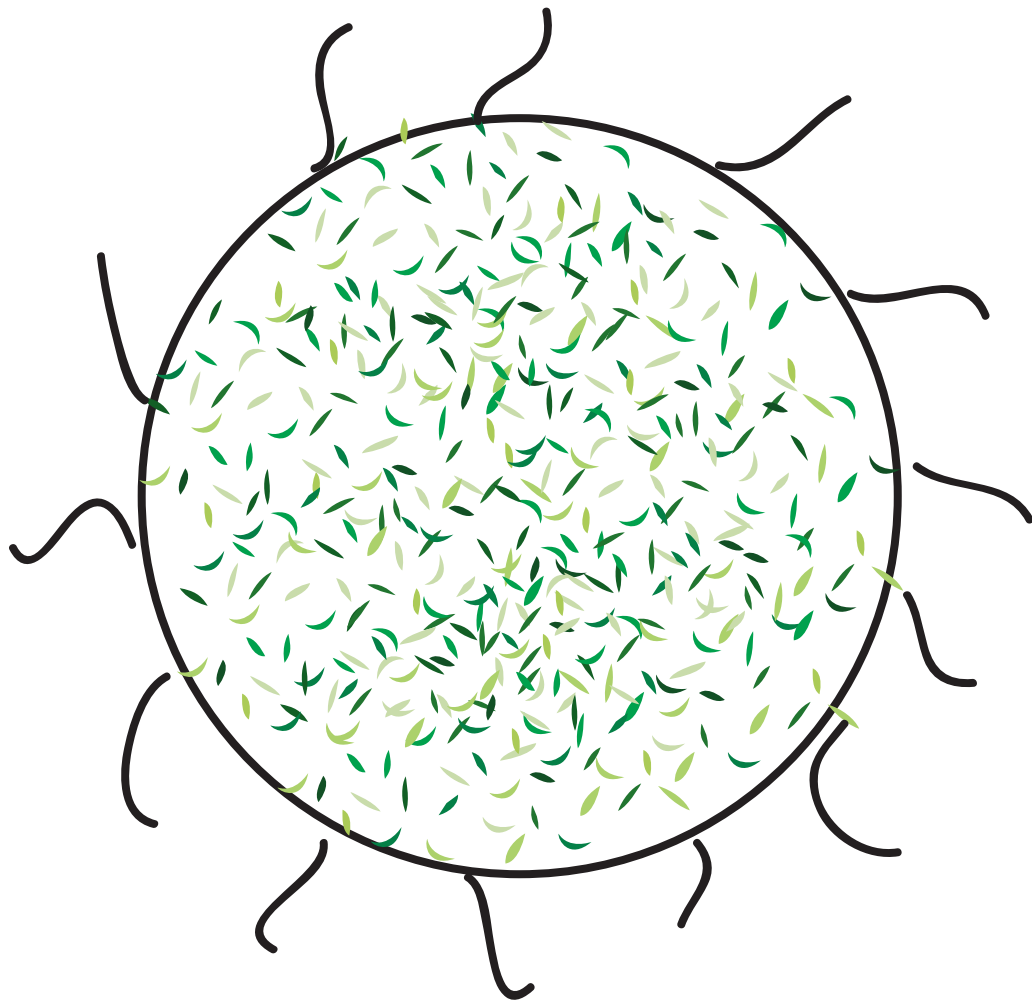

○ Earth

Imagine flying an airplane to the Sun!

The Sun

Activity on the Sun

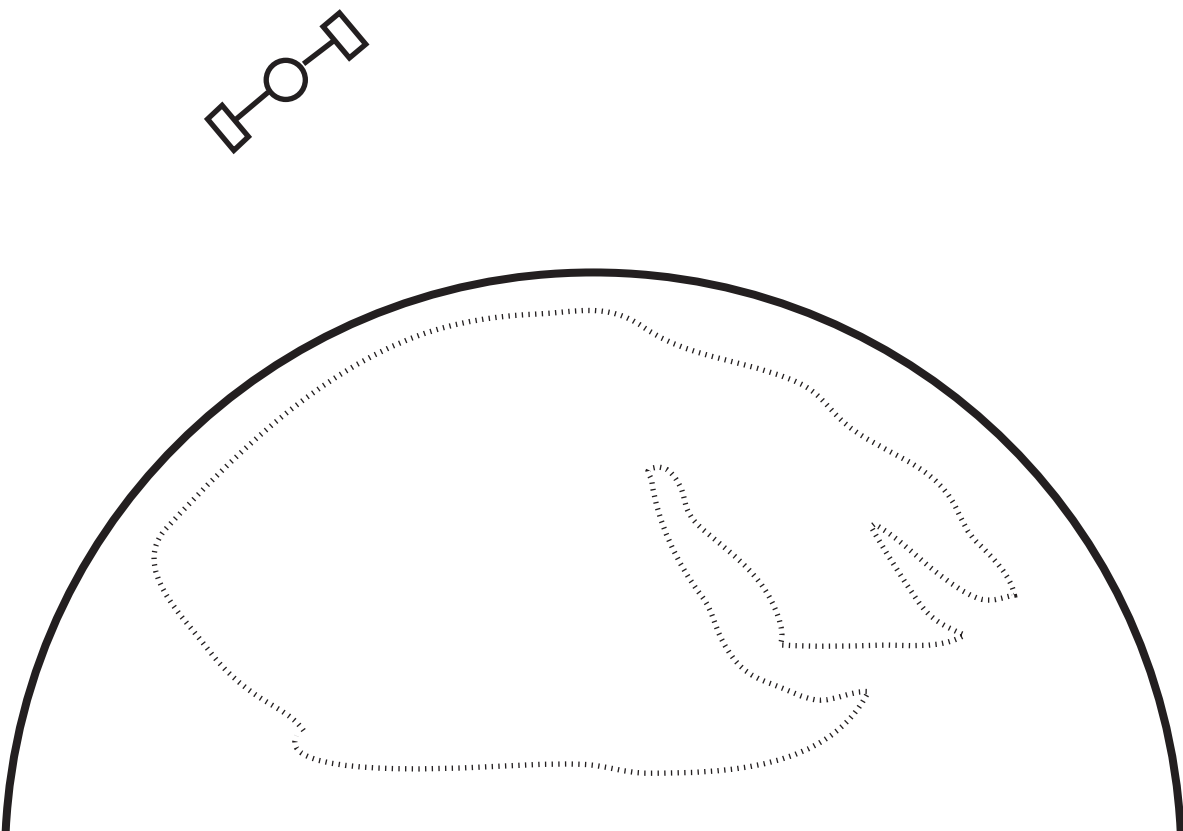

Sunspots on the Sun and solar flares around the edge of the Sun.

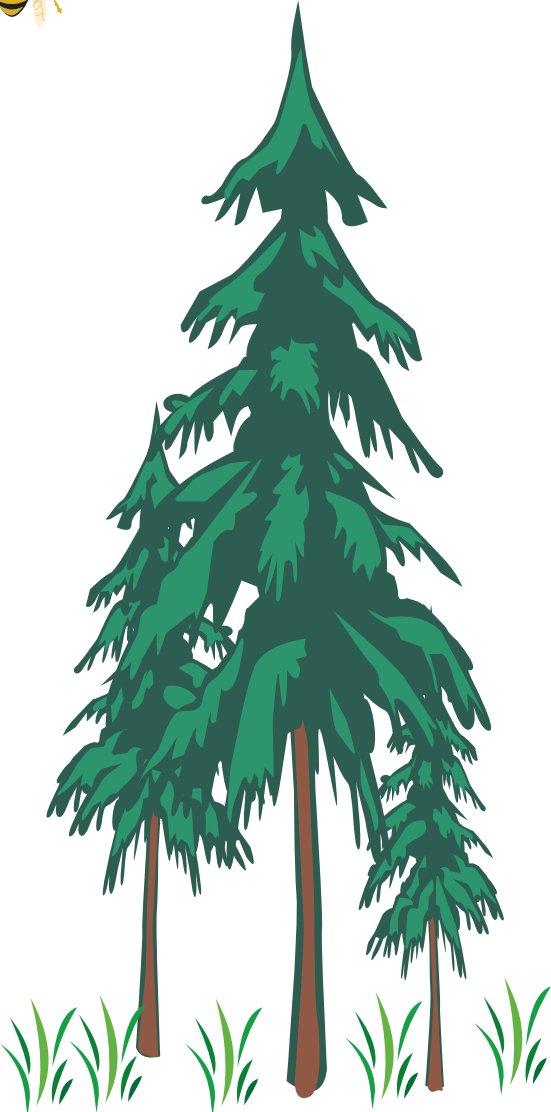

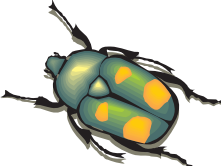

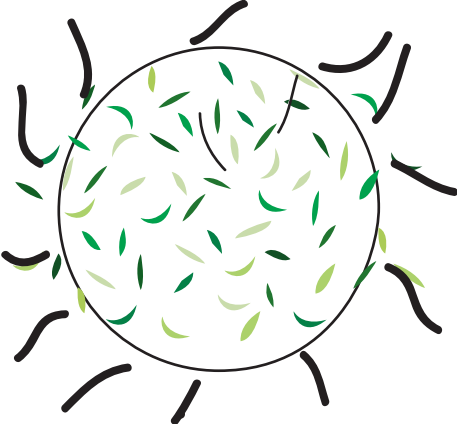

The aurora as seen against a starry night sky.

A communications satellite orbits the Earth.

Without the Sun, there would be no trees, insects, animals, or people on Earth.

The Earth limb surrounded by stars and the Sun in the distance.
